安全围栏 Underground Warning Mesh

Underground warning extruded mesh / Signal mesh / Underground warning mesh for marking underground

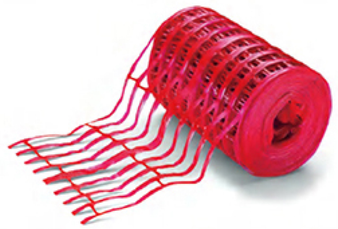

Product Description

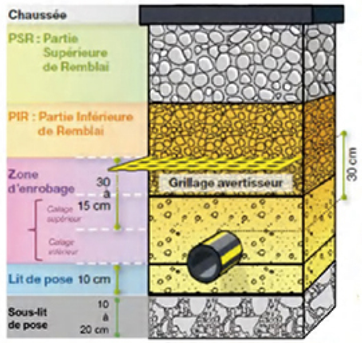

1.Warning / detection:Underground pipes and electric lines,oil pipes and communication cable.

2.CHIXIN Signal Fence is an underground warning mesh used for the marking and location of buried pipes and cables.It is laid in the excavation trench about 500mm above the cable or pipe line.During future re-excavation works,the highly visible band will alert excavators to the pipe/ cables below.

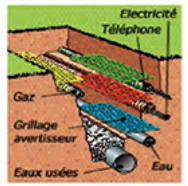

3.CHIXIN manufactures underground warning meshes for applications in civil engineering that require buried services and utilities to be marked and protected when buried and that provide a visual warning to rogue excavations.
